As of 2021 Argentina had 2.5 billion barrels of proved oil reserves, extracted about 635.0 thousand barrels of crude oil per day, 14.0 Tcf of proved natural gas, extracted about 1454.7 Bcf of natural gas and 499.9 million tonnes of coal, extracted about 24.2 thousand short tons of coal. Argentina's conventional oil infrastructure include 8 operating oil refineries with a total crude oil processing capacity of 630 600 b/d; some oil terminals and oil storages. There are 6248 km of crude oil, 3631 km of refined products and 41 km of liquid petroleum gas pipelines. Conventional natural gas - include two operating LNG import terminals, 6 gas processing plants; 29 930 km of natural gas pipeline and 33 natural gas compressor plants.
