

Oman • Fossil fuels

Conventional proved reserves by fuels, Billion tonnes of oil equivalent (%):

Source: Based on the U.S. Energy Information Administration data (Mar 2024).

Oil refineries, bpd:

- 1 Sohar, ORPIC, 197 000
- 2 Mina Al Fahal, ORPIC, 106 000
- 3 Dugm Refinery, 230 000 (under construction)

LNG export terminal:

- 1 Oman-Qalhat

Major heavy oil extraction fields:

- 1 Mukhaizna
- 2 Nimr
- 3 Amal
- 4 Marmul
- 5 Qarn Alam

Unconventional reserves by fuels, Billion tonnes of oil equivalent (%):

Source: Based on the U.S. Energy Information Administration 2015 data (Mar 2024).

Key oil extraction fields:

- 1 Al-Huwaisah
- 2 Yibal
- 3 Fahud
- 4 Natih
- 5 Lekhwair
- 6 Safah

Key natural gas extraction fields:

- 1 Khazzan-Makarem
- 2 Saih Rawl
- 3 Kauther
- 4 Yibal

Key oil terminals:

- 1 Mina Al Fahal
- 2 Sohar
- 3 Salalah

Key oil storages:

- 1 Mina Al Fahal
- 2 Al Jifnain
- 3 Sohar
- 4 Raysut (Salalah)
- 5 Ras Markaz*

* under construction

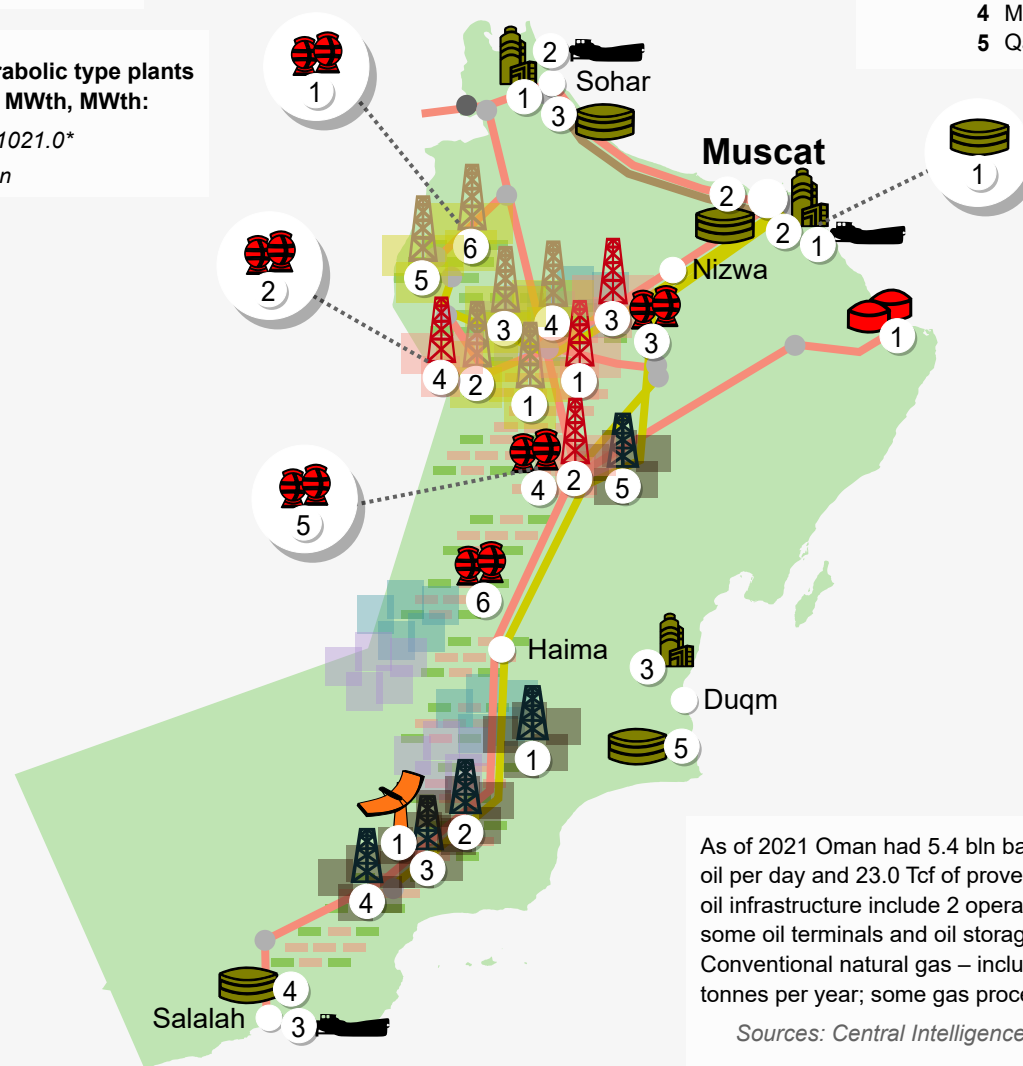

CSP Parabolic type plants over 1.0 MWth, MWth:

- 1 Miraah, 1021.0*

* under construction

Key natural gas processing plants:

- 1 Lekhwair
- 2 Yibal
- 3 Kauther
- 4 Saih Rawl
- 5 Saih Nihayda
- 6 Zauliyah

Oman has 48.3 trillion cubic feet of technically recoverable shale gas and 6.2 billion barrels of shale oil. Oman has a potential of unconventional fuel such as shale gas and oil shale in the south and north areas of Oman. Available data about unconventional fuel exploration or mining not be found or still in development stage.

Source: U.S. Energy Information Administration (Dec 2021)

As of 2021 Oman had 5.4 bln barrels of proved oil reserves, extracted about 958.6 thousand barrels of crude oil per day and 23.0 Tcf of proved natural gas, extracted about 1292.4 Bcf of natural gas. Oman's conventional oil infrastructure include 2 operating oil refineries with a total crude oil processing capacity of 303 000 bpd; some oil terminals and oil storages. There are 3558 km of crude oil and 264 km of refined products pipelines. Conventional natural gas – include 1 operating LNG export terminal with a total export capacity of 10.8 million tonnes per year; some gas processing plants; 4224 km of natural gas and 106 km of condensate pipelines.
