**Conventional proved reserves by fuels,  
Billion tonnes of oil equivalent (%):**

Source: Based on the U.S. Energy Information Administration data (Mar 2024)

As of 2021 Turkmenistan had 600.0 million barrels of proved oil reserves, extracted about 252.0 thousand barrels of crude oil per day, 400.0 Tcf of proved natural gas, extracted about 2953.1 Bcf of natural gas. Turkmenistan's conventional oil infrastructure includes 2 operating oil refineries with a total crude oil processing capacity of 236 000 bpd; some oil storages and oil terminals. There are 1501 km of oil pipeline. Conventional natural gas – include some gas processing plants and compressor stations, one gas-to-liquid plant; 7500 km of natural gas pipeline.
